SUMMARY

This is a report of forest production in Nova Scotia for the Calendar year 1982 , based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Program Planning Branch.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1982, regardless of whether the wood was purchased, custom-sawn or produced by the mill-owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling.

Production data is concerned only with wood of Nova Scotia origin.

Production is shown as accurately as possible by county of origin. Resawn volumes are left out of this report to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 2 736 324 m^3, solid-wood-equivalent, down 26% from 1981. Sawlog volume decreased by 12% from 1981, amounting to 784 430 m^3 equivalent. Round products decreased by 30% to 1 951 894 m^3 equivalent.

Production of pulp chips from sawmills decreased by 29% from 1981.

Compared to 1981, increases were reported for railway ties, pit props, shingles, staves & headings. Decreases occurred in softwood lumber, hardwood lumber, pulpwood, pulp chips, mine packs, laths, poles & piling and boxwood.

The pulp and paper segment of the industry is comprised of five mills: A kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

The total number of firms operating all types of sawmills increased from 375 in 1981 to 376 in 1982.

The number of firms producing over one million board feet during 1982 was 35, ten less than in 1981. There were 290 firms producing less than one million board feet per firm compared to 280 in 1981.

Of the smaller producers 211 produced 100 Mfbm or less in 1982.

Firms producing over one million board feet per firm accounted for 10.8% of the number of firms and produced 77.5% of the lumber and boxwood.

SUMMARY OF PRODUCERS BY TYPE OF SAWN PRODUCT

	1981	1982
Number of firms producing lumber only	273	272
Number of firms producing boxwood only	4	5
Number of firms producing ties only	0	0
Number of firms producing mine packs only	0	1
Number of firms producing laths only	28	29
Number of firms producing shingles only	18	16
Number of firms producing staves & headings	4	3
Sub Total	327	326
Number of firms producing more than 1 product	48	50
Total Number of Firms	375	376

See "List of Sawmill Owners and Materials Produced - 1982" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres per owner. Small private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
